WORK EXPERIENCE

Frontend Developer (Contract)

Intellishift

March 2021-Jun 2021

Implements frontend logic of web-based application used to monitor and track employees activities and share award and in-built shop. During this project I worked with ReactJS and AntDesign to create reusable components that were powered with a RESTAPI and learned a lot in process.

Jnr. Frontend Developer (Contract)

DotslashRun

March 2020 to Nov 2020

Worked on a wide range of product/project where I used mostly HTML, CSS, Vanilla Javascript, SCSS, Figma. During my time, I learned how the web works and what practices are best and how to improve the UX of a website by using only needed modules and keeping simple but functional.

Frontend (React) Freelance Developer.

Self.

Currently.

I currently take on project as a Freelance Developer and help my individual clients to build their websites/applications. In this period I've worked with different types of application's needs and I've learned and still learning to pick the right web technology for each project and application I build.

EDUCATIONAL BACKGROUND

AISS High School

Oko-Afo

Leaving Certificate.

2014

Google Africa Scholarship (Pluralsight - Frontend Track)

Frontend Developer Certificate.

2019

PROFESSIONAL SUMMARY

A creative and collaborative Frontend Developer with an eye for clean UI and functional UX. I enjoy building products that help people in any way possible and makes life easier. I also love working in teams as this gives me the opportunity to learn from others and also share my ideas when possible.
